

according to Regulation (EC) No. 453/2010 MADE IN HOLLAND Date of issue: 24/11/2014

Revision date: 24/11/2014

Version: 1.2

SECTION 1: Identification of the su	ubstance/mixture and of the company/undertaking
1.1. Product identifier	ibstance/mixture and of the company/undertaking
Product form	: Mixture
Product name	: Rymax Apollo C2 SAE 5W/30
Product code	: lub003018
Product group	: Trade product
1.2. Relevant identified uses of the su	bstance or mixture and uses advised against
1.2.1. Relevant identified uses	
Intended for general public	
Main use category	: industrial use, professional use, consumer use
Use of the substance/mixture	: Lubricant
Function or use category	: Lubricants and additives
1.2.2. Uses advised against	
No additional information available	
1.3. Details of the supplier of the safet	tv data sheet
Rymax b.v.	
Delweg 8	
6902 PJ Zevenaar The Netherlands	
info@rymax-lubricants.com	
tel: +31 (0) 316-740856	
1.4. Emergency telephone number	
Emergency number	: +31 (0)316 740 856
	(Monday to Friday: 8:00 - 17:00)
<b>SECTION 2: Hazards identification</b>	
2.1. Classification of the substance or	mixture
Classification according to Regulation (EC)	) No. 1272/2008 [CLP]
Not classified	
Classification according to Directive 67/548	3/EEC [DSD] or 1999/45/EC [DPD]
Not classified	
2.2. Label elements	
Labelling according to Regulation (EC) No.	1272/2008 [CLP]
Precautionary statements (CLP)	: P102 - Keep out of reach of children
EUH phrases	: EUH210 - Safety data sheet available on request
2.3. Other hazards	
2.3. Other hazards Other hazards not contributing to the	: This product floats on water and may affect the oxygen-balance in the water. The base oil
	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified
Other hazards not contributing to the	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting
Other hazards not contributing to the	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer.
Other hazards not contributing to the	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be
Other hazards not contributing to the classification	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be avoided and a high standard of personal hygiene maintained.
Other hazards not contributing to the classification SECTION 3: Composition/informat	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be avoided and a high standard of personal hygiene maintained.
Other hazards not contributing to the classification SECTION 3: Composition/informat 3.1. Substance	contains less than 3% DMSO-extract measured according IP 346, therefore it is NOT classified as T/R45: May cause cancer" (Note L).". USED ENGINE OILS: Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be avoided and a high standard of personal hygiene maintained.

SECTION 4: First aid measures	
4.1. Description of first aid measure	S
First-aid measures general	: Seek medical attention if ill effect develops.
First-aid measures after inhalation	: Take victim to fresh air, in a quiet place, in an half laying position and if necessary take medi- advice. Allow the victim to rest.
First-aid measures after skin contact	<ul> <li>Remove affected clothing and wash all exposed skin area with mild soap and water, followed by warm water rinse. High-pressure injection under skin may cause serious damage. Seek medical attention if ill effect or irritation develops.</li> </ul>
First-aid measures after eye contact	<ul> <li>Remove contact lenses, if present and easy to do. Continue rinsing. Ensure adequate flushir of eyes by separating eyelids with the fingers. Obtain medical attention if pain, blinking, tears redness persist.</li> </ul>
First-aid measures after ingestion	: Consult a doctor/medical service if you feel unwell. If vomiting occurs spontaneously, keep head below the hips to prevent aspiration. Do not induce vomiting.
4.2. Most important symptoms and o	effects, both acute and delayed
Symptoms/injuries after inhalation	: At normal ambient temperatures this product will be unlikely to present an inhalation hazard because of its low volatility. May be harmful by inhalation if exposure to vapour, mists or fum resulting from thermal decomposition products occurs.
Symptoms/injuries after skin contact	: Unlikely to cause harm to the skin on brief or occasional contact but prolonged or repeated exposure may lead to dermatitis. High pressure injection of product into the skin may lead to local necrosis if the product is not surgically removed.
Symptoms/injuries after eye contact	: Unlikely to cause more than transient stinging or redness if accidental eye contact occurs.
Symptoms/injuries after ingestion	: Bad taste. Unlikely to cause harm if accidentally swallowed in small doses, though larger quantities may cause nausea and diarrhoea.
Symptoms/injuries upon intravenous administration	: Unknown.
I.3. Indication of any immediate me	dical attention and special treatment needed
Treat symptomatically.	
SECTION 5: Firefighting measure	9S
5.1. Extinguishing media	
Suitable extinguishing media	: Carbon dioxide (CO2), dry chemical powder, foam. Water fog.
Jnsuitable extinguishing media	
	. Do not use a neavy water stream. Use of neavy stream of water may spread life.
	: Do not use a heavy water stream. Use of heavy stream of water may spread fire.
5.2. Special hazards arising from the	e substance or mixture
5.2. Special hazards arising from the	e substance or mixture : Combustion generates : CO, CO2, POx, NOx, SOx, H2S. Metallic oxides.
5.2. Special hazards arising from the Fire hazard Explosion hazard	e substance or mixture
5.2. Special hazards arising from the Fire hazard Explosion hazard 5.3. Advice for firefighters	<ul> <li>e substance or mixture</li> <li>: Combustion generates : CO, CO2, POx, NOx, SOx, H2S. #### Rymax Apollo C2 SAE 5W/30

Safety Data Sheet

according to Regulation (EC) No. 453/2010

6.1.2. For emergency responders	
Protective equipment	: When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.
Emergency procedures	: No specific measures are necessary.
6.2. Environmental precautions	
	e material. Notify authorities if product enters sewers or public waters. Prevent soil and water pollution. courses, underground or low areas. Contain any spills with dikes or absorbents to prevent migration and
6.3. Methods and material for conta	ainment and cleaning up
For containment	: Large quantities: Contain large spillage with sand or earth.
Methods for cleaning up	: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Take up large spills with pump or vacuum and finish with dry chemical absorbent.
Other information	: Use suitable disposal containers. Sweep up and remove to a suitable, clearly marked containe for disposal in accordance with local regulations. On water, recover/skim from surface and pou out in disposal container.
6.4. Reference to other sections	
For further information refer to section 13.	
<b>SECTION 7: Handling and stora</b>	ge
7.1. Precautions for safe handling	
Additional hazards when processed	Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly.
Precautions for safe handling	: Avoid prolonged and repeated contact with skin. May be dangerously slippery if spilled. Where contact with eyes or skin is likely, wear suitable protection. Do not eat, drink or smoke during use. Remove contaminated clothing and shoes.
Hygiene measures	: Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems. Handle in accordance with good industrial hygiene and safety practice. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Where contact with eyes or skin is likely, wear suitable protection. Wash contaminated clothing before reuse.
7.2. Conditions for safe storage, in	cluding any incompatibilities
Technical measures	: Keep container tightly closed and in well ventilated place.
Storage conditions	: Store in original container.
Incompatible products	: Reacts vigorously with strong oxidizers and acids.
Maximum storage period	: 5 year
Storage temperature	: ≤ 40 °C.
Prohibitions on mixed storage	: Keep away from : oxidizing materials. strong acids.
Storage area	: Store at ambient temperature.
Special rules on packaging	: Keep container tightly closed and dry.
7.3. Specific end use(s)	

No additional information available

#### SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Lubricating oils (petroleum),	C20-C50, hydrotreated neutral oil-based (72623-87-1	
Finland	HTP-arvo (8h) (mg/m³)	5 mg/m³
USA - ACGIH	ACGIH STEL (mg/m <sup>3</sup> )	10 mg/m <sup>3</sup>
Exposure-value for oil mist 8.2. Exposure controls	: 10 mg/m3 (15 min.) or 5 mg/m3 (8 h	ours).
Appropriate engineering controls	: Large quantities: Contain large spilla	ge with sand or earth.
Personal protective equipment	: Gloves. In case of splash hazard: sa where liquid could be splashed or sp	fety glasses. Eye protection should only be necessary rayed.

according to Regulation (EC) No. 453/2010

Materials for protective clothing	: PVC gloves. Neoprene or nitrile rubber gloves
Hand protection	: In case of repeated or prolonged contact wear gloves. The gloves should be replaced immediately in case of damage or signs of wear. It is recommended to use preventative skin protection (skin cream). The protection glove should be tested for its specific suitability (e.g. mechanical strength, product compatibility, anti-static properties).
Eye protection	: Eye protection should only be necessary where liquid could be splashed or sprayed
Skin and body protection	No special clothing/skin protection equipment is recommended under normal conditions of use. Avoid repeated or prolonged skin contact. If repeated skin contact or contamination of clothing is likely, protective clothing should be worn. Equipment should conform to EN 166.
Respiratory protection	Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure. Where excessive vapour, mist, or dust may result, use approved respiratory protection equipment. Respiratory protective equipment must be checked to ensure it fits correctly each time it is worn. Provided an air-filtering/air-purifying respirator is suitable, a filter for particulates can be used for mist or fume. Use filter type P or comparable standard. A combination filter for particles and organic gases and vapours (boiling point >65°C) may be required if vapour or abnormal odour is also present due to high product temperature. Use filter type AP or comparable standard.
Environmental exposure controls	: See Heading 12. See Heading 6.
Consumer exposure controls	: PVC gloves. Neoprene or nitrile rubber gloves.
Other information	: Do not put the product-soaked rags into the pockets of working clothes. Do not use cloths stained with the product to dry hands. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Do not eat, drink or smoke during use. Wash contaminated clothing before reuse.

<b>SECTION 9: Physical and chemica</b>	l properties
9.1. Information on basic physical and	
Physical state	: liquid
Appearance	: Oily. liquid.
Colour	: Amber.
Odour	: characteristic.
Odour threshold	: no data available
pH	: no data available
Relative evaporation rate (butylacetate=1)	: < 0,1
Melting point	: <= -48 °C.
Freezing point	: no data available
Boiling point	: > 280 °C.
Flash point	: 207 °C.
Auto-ignition temperature	: > 240 °C.
Decomposition temperature	: no data available
Flammability (solid, gas)	: no data available
Vapour Pressure 20°C	: < 0,1 hPa
Relative vapour density at 20 °C	: > 1 (air=1)
Relative density	: no data available
Density	: 0,845 - 0,855 kg/l
Solubility	: insoluble in water.
Log Pow	: >3
Viscosity, kinematic	: 100 - 200 cSt
Viscosity, dynamic	: no data available
Explosive properties	: no data available
Oxidising properties	: no data available
Explosive limits	: 0,6 - 7 vol %
9.2. Other information	
VOC content	: 0%
Other properties	: Gas/vapour heavier than air at 20'C.
30/03/2015	EN (English) 4/

according to Regulation (EC) No. 453/2010

SECTION 10: Stability and reactivity	
10.1. Reactivity	
Stable under normal conditions of use.	
10.2. Chemical stability	
Stable under normal conditions.	
10.3. Possibility of hazardous reactions	
Refer to section 10.1 on Reactivity.	
10.4. Conditions to avoid	
Moisture. Overheating.	
10.5. Incompatible materials	
Strong oxidizing agents. strong acids.	
10.6. Hazardous decomposition products	
CO, CO2, POx, NOx, SOx, H2S. Metallic oxides.	
SECTION 11: Toxicological informati	on
11.1. Information on toxicological effects	
Acute toxicity	: Not classified (Based on available data, the classification criteria are not met)
Lubricating oils (petroleum), C20-C50, hydro	treated neutral oil-based (72623-87-1)
LD50 oral rat	> 5000 mg/kg (OECD 401 method)
LD50 dermal rabbit	> 2000 mg/kg (OECD 402 method)

LD50 dermal rabbit	> 2000 mg/kg (OECD 402 method)
LC50 inhalation rat (mg/l)	> 5,53 mg/l/4h (OECD 403 method)
Skin corrosion/irritation	: Not classified
Serious eye damage/irritation	: Not classified
Respiratory or skin sensitisation	: Not classified
Germ cell mutagenicity	: Not classified
Carcinogenicity	: Not classified
Reproductive toxicity	: Not classified
Specific target organ toxicity (single exposure)	: Not classified
Specific target organ toxicity (repeated exposure)	: Not classified
Aspiration hazard	: Not classified
Rymax Apollo C2 SAE 5W/30	
Viscosity, kinematic	100 - 200 mm²/s
Other information	: Toxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the toxicology of similar products. Likely route of exposure: ingestion, skin and eye.

SECTION 12: Ecological information	
12.1. Toxicity	
Ecology - general	Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products.
Ecology - water	This product floats on water and may affect the oxygen-balance in the water.
Lubricating oils (petroleum), C20-C50, hydrot	reated neutral oil-based (72623-87-1)
LC50 fish 1	≈ 100 mg/l (OECD 203 method)
12.2. Persistence and degradability	
Rymax Apollo C2 SAE 5W/30	
Persistence and degradability	Not readily biodegradable.
12.3. Bioaccumulative potential	
Rymax Apollo C2 SAE 5W/30	
Log Pow	> 3
Bioaccumulative potential	This product is not expected to bioaccumulate through food chains in the environment.
Lubricating oils (petroleum), C20-C50, hydrot	reated neutral oil-based (72623-87-1)
Log Kow	> 6

# Rymax Apollo C2 SAE 5W/30 Safety Data Sheet according to Regulation (EC) No. 453/2010

2.4. Mobility in soil	
Rymax Apollo C2 SAE 5W/30	Not missible with water. Spillages may constrate the spill sourcing ground water contamination
Ecology - soil	Not miscible with water. Spillages may penetrate the soil causing ground water contamination. This product floats on water and may affect the oxygen-balance in the water.
I2.5. Results of PBT and vPvB asses	sment
No additional information available	
2.6. Other adverse effects	
No additional information available	
SECTION 13: Disposal considera	tions
I3.1. Waste treatment methods	
Regional legislation (waste)	: Disposal must be done according to official regulations.
Vaste disposal recommendations	: Dispose in a safe manner in accordance with local/national regulations. Do not discharge into drains or the environment.
Additional information	: Hazardous waste.
Ecology - waste materials	Every mixture with foreign substances such as solvents, brake- and cooling liquids is forbidded Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly. When not empty dispose of this container at hazardous or special waste collection point.
European List of Waste (LoW) code	: 13 02 06* - Synthetic engine, gear and lubricating oils
SECTION 14: Transport informati	on
n accordance with ADR / RID / IMDG / IATA	
I4.1. UN number	
Not regulated for transport	
I4.2. UN proper shipping name	
Proper Shipping Name	: Not applicable
Proper Shipping Name (IMDG)	: Not applicable
Proper Shipping Name (IATA)	: Not applicable
Proper Shipping Name (ADN)	: Not applicable

I4.4. Packing group	
Packing group (UN)	: Not applicable
Packing group (IMDG)	: Not applicable
Packing group (IATA)	: Not applicable
Packing group (ADN)	: Not applicable
Packing group (RID)	: Not applicable
4.5. Environmental hazards	
Dangerous for the environment	: No
Dangerous for the environment Marine pollutant	: No : No

# Rymax Apollo C2 SAE 5W/30 Safety Data Sheet according to Regulation (EC) No. 453/2010

Other information	: No supplementary information available
4.6. Special precautions for user	
Overland transport	
o data available	
Transport by sea	
o data available	
Air transport	
o data available	
Inland waterway transport	
lot subject to ADN	: No
Rail transport	
Carriage prohibited (RID)	: No
4.7. Transport in bulk according t	o Annex II of MARPOL 73/78 and the IBC Code
lot applicable	
<b>SECTION 15: Regulatory inform</b>	nation
5.1. Safety, health and environme	ntal regulations/legislation specific for the substance or mixture
5.1.1. EU-Regulations	
Contains no substances with Annex XVII	restrictions
Contains no substance on the REACH ca	ndidate list
Contains no REACH Annex XIV substance	
Contains no REACH Annex XIV substand	bes
Contains no REACH Annex XIV substance /OC content 15.1.2. National regulations	bes
Contains no REACH Annex XIV substand	<ul> <li>: 0 %</li> <li>: Water hazard class (WGK) 3, severe hazard to waters (Classification according to VwVwS,</li> </ul>
